

EPOS

Guide

EXPAND Vision 5

What to Consider

Requirements

Included:

- EXPAND Control meeting room controller
- HDMI Cable (Connects EXPAND Vision 5 and the Display/Monitor)
- Power supply unit

Not included:

- Network cable (Connects EXPAND Vision 5 and network port)
- Display/TV Monitor (Wall display to see the remote participants)

Optional:

- USB-C to USB-C (Connects your laptop to the Camera if you are in a BYOD room)
- EXPAND 80 Speakerphone + 2 extension mics for EXPAND 80
- HDMI Cable (Content sharing from laptop if you are in a BYOD room)
- USB_C to HDMI cable for Dual screen support

Prerequisites

Room Size:

EXPAND Vision 5 is designed for small and medium-sized meeting rooms for up to 11 participants

Network Ports

- 2 Network ports in each video meeting room. To pair Expand controller with Expand Vision video devices the network ports must be in the same subnet. At least one of the ports needs to have PoE to power up the Expand Controller connecting with a network cable. [Prepare your network](#)

Microsoft Teams License

- Learn more about assignment and configuration of MTR Room Basic or PRO license [here](#)

Firewall port opening

- The tool probes your network to check if all firewall ports are open.
If ports are not reachable you have to open the relevant ports on your security platforms.
[Firewall port opening for MS Teams](#) (Network Assessment tool)

For more information see the EXPAND Vision 5 [User Guide](#)

Firewall Setup for EPOS Manager:

Open firewall port 443 over tcp outbound.

How to enroll video device to EPOS Manager

Sign up for a tenant here:

[EPOS Manager](https://eposaudio.com) (eposaudio.com)

Log in to the EPOS Manager tenant:

Choose Provision > Create quick connect code

EPOS

Company Name : EPOS HQ BETA TENANT

Quick Connect Codes

Create Quick Connect Code

EPOS

Company Name : EPOS HQ BETA TENANT Tenant Name : EPOS HQ BETA TENANT

Edit Quick Connect Code

Quick Connect Name * EVS_EX_BNSR

Expiry Date Never Expires

Number Of Devices Allowed Unlimited

Device Settings

Select Models* EXPAND Vision 5 EXPAND Control EXPAND Vision 3T

Communication App * Teams

Language * English

Timezone * Europe/Copenhagen

Timeformat * 24-hour

Password * 0000

Save Cancel

Insert the data relevant for your video device. If you do not limit the "Number of Devices Allowed" The QR code can be reused for multiple video devices. Choose Save and use the QR code to enroll the device with settings provided and get it enrolled to EPOS Manager.

Quick Connect QR Code: GXQICL7P7

[Download QR Code](#)

[Copy QR Code](#)

Use the QR code to enroll multiple devices into EPOS Manager with relevant settings. (NB! Do not use this QR code for your deployment, make sure you create your own)

Setup & Installation

First Time Setup / Enrollment with QR code

EPOS

Setup using EXPAND Control
Device serial number "A004410223700038"

Ensure that the EXPAND Control and the EXPAND Vision are connected via Ethernet to the same subnet. On the EXPAND Control scan for devices and select the serial number above to connect.

Setup using EXPAND Vision Remote Control

To pair the Remote Control hold "Back" and "OK" buttons until the red LED blinks, then power cycle the EXPAND Vision. Use the Remote Control pointer to select "Continue" and follow the instructions.

Alternative setup using mouse

Connect a mouse to the USB-port on EXPAND Vision. Use the mouse pointer to select "Continue" and follow the instructions.

Continue →

Attach all relevant cables to the Expand Video Device. Always attach the Power cord last. Let the device boot up. (refer to connection guide already made)

EPOS

Search for nearby devices to connect

Select one of the following devices to connect

SEARCH AGAIN FOR NEARBY DEVICES

SN 0520000028

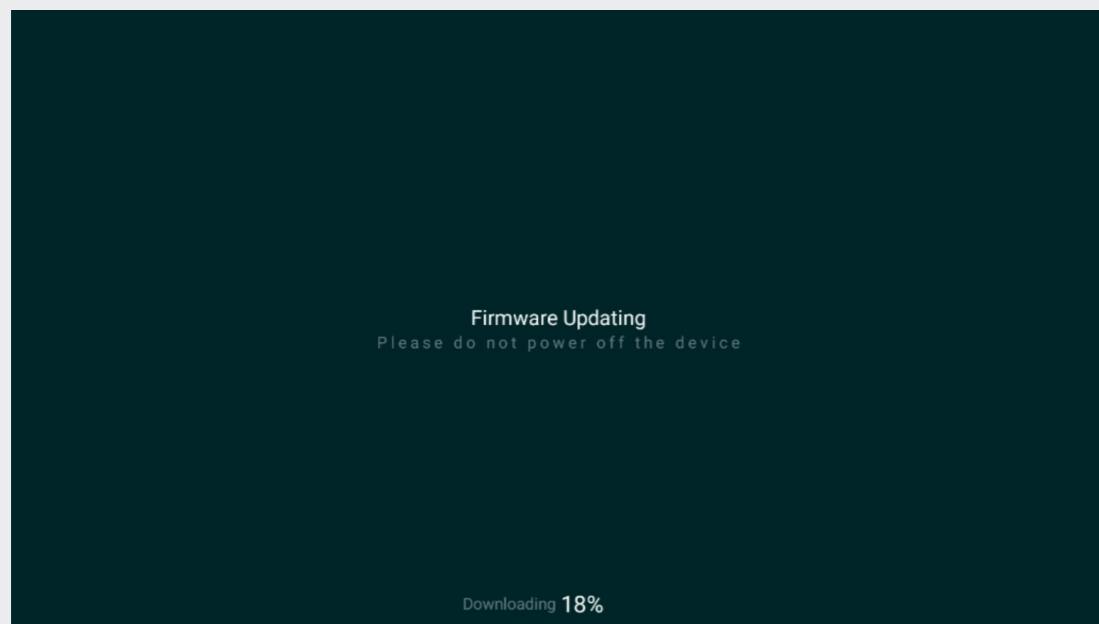

SN A004410223700038

Continue with this device only →

Controller

Display

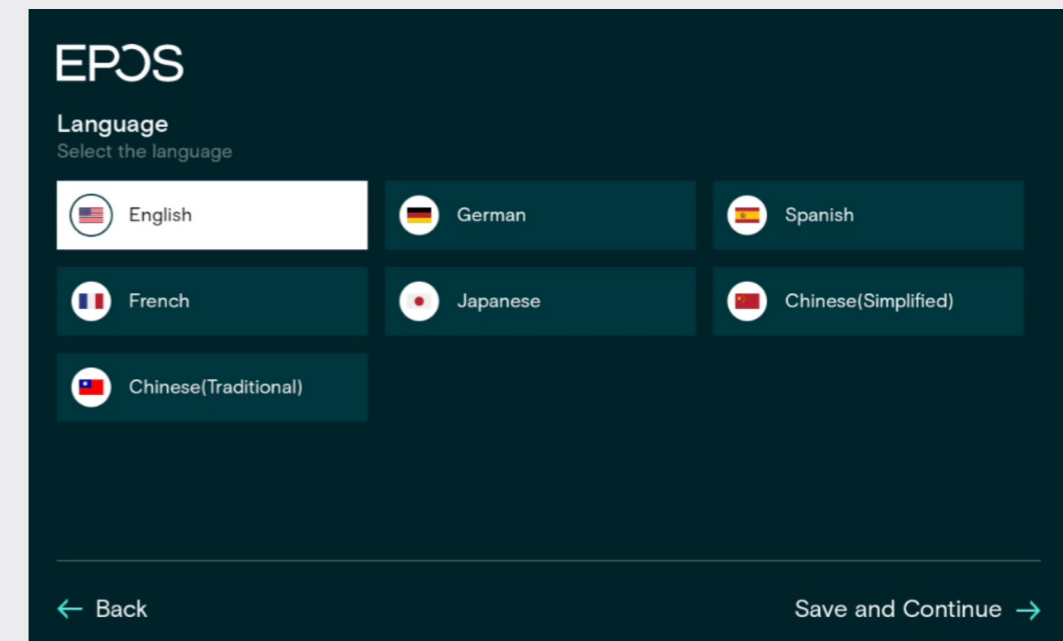

Display

Use the created QR code to enroll the devices into EPOS Manager. The system will automatically deploy the settings contained in the QR code and upgrade the video device and controller to the latest FW.

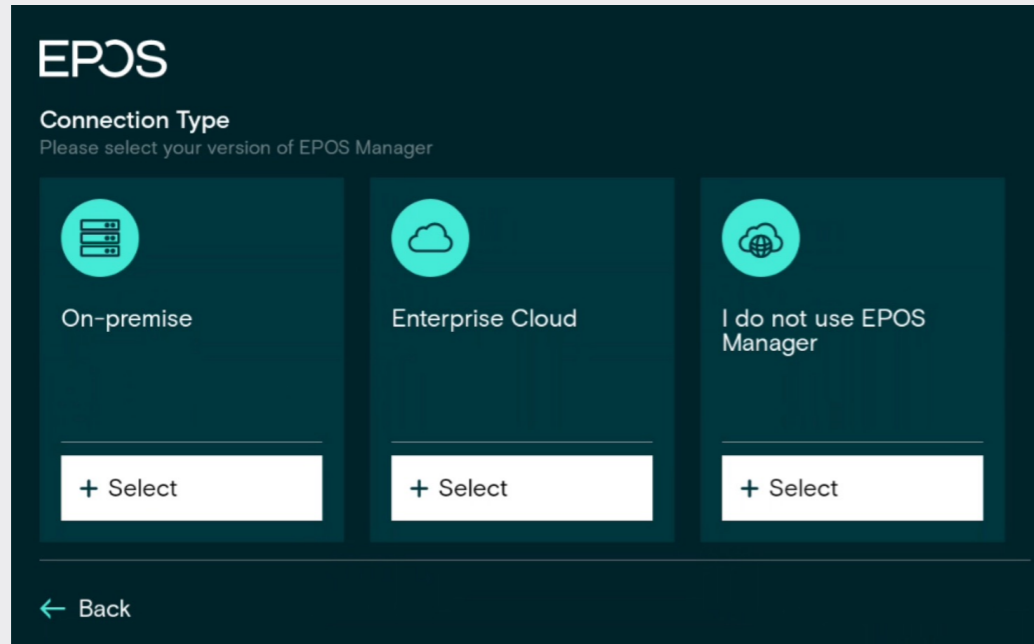

Enrollment without QR code

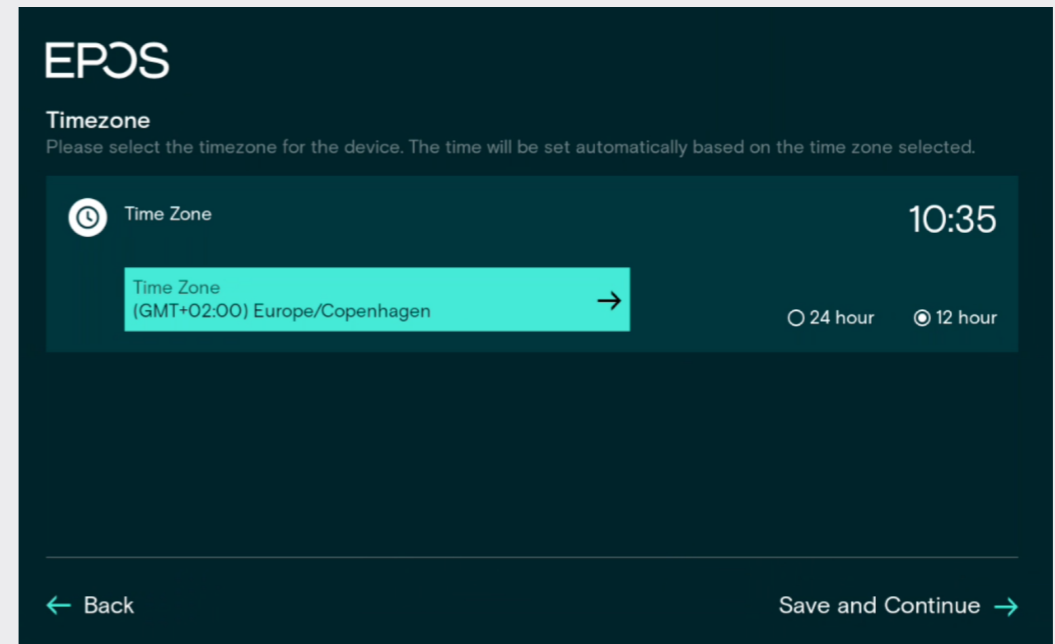

Choose Continue with this device only

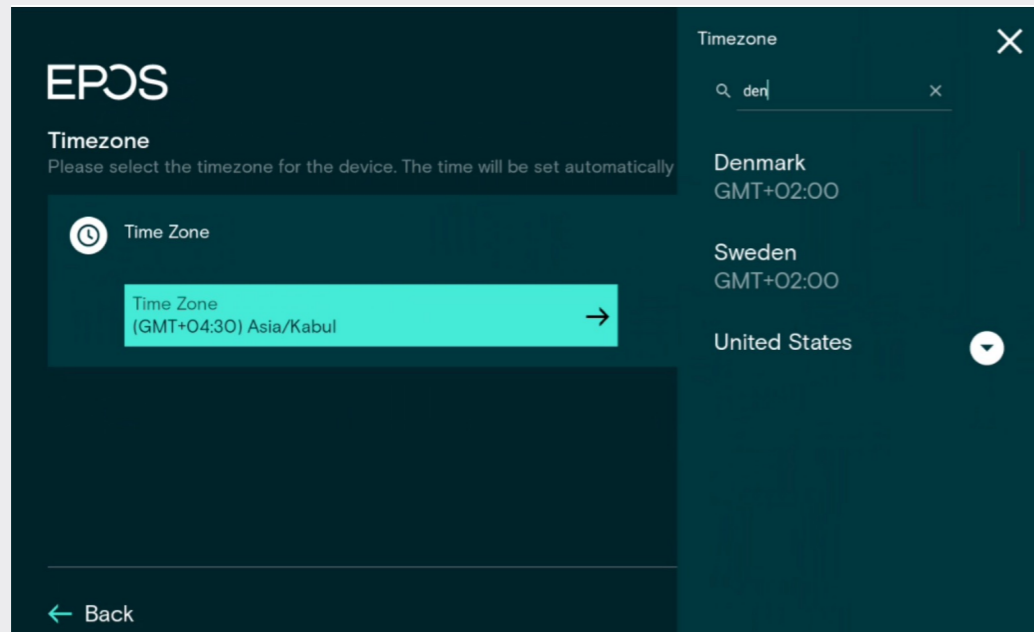

Choose Language > Save and Continue

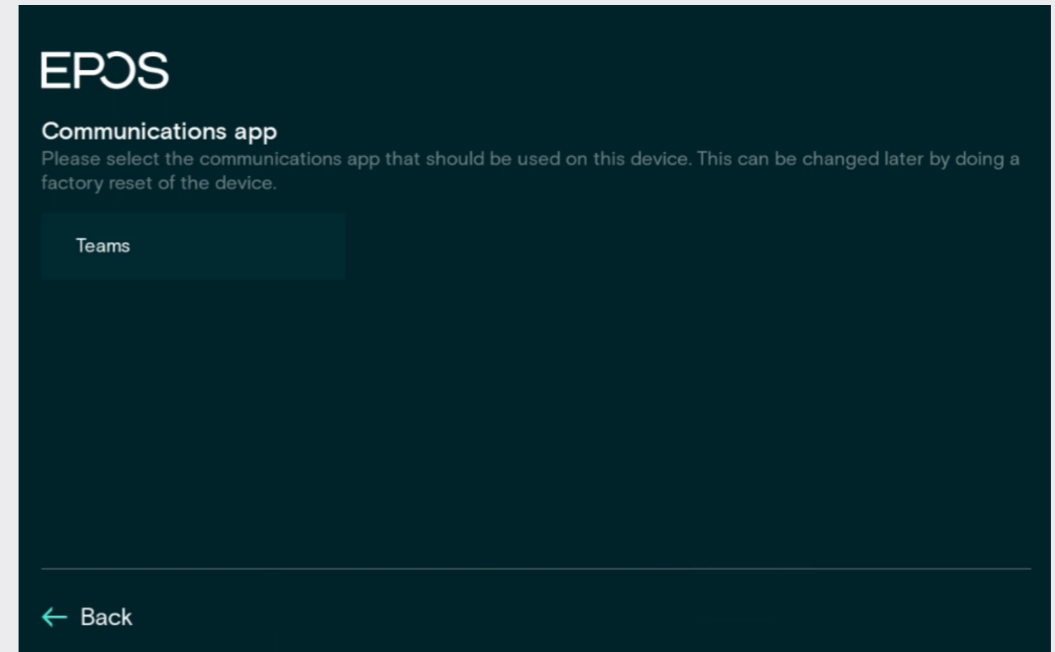

I do not use EPOS Manager > choose select

Pick your Country/Time zone and hour

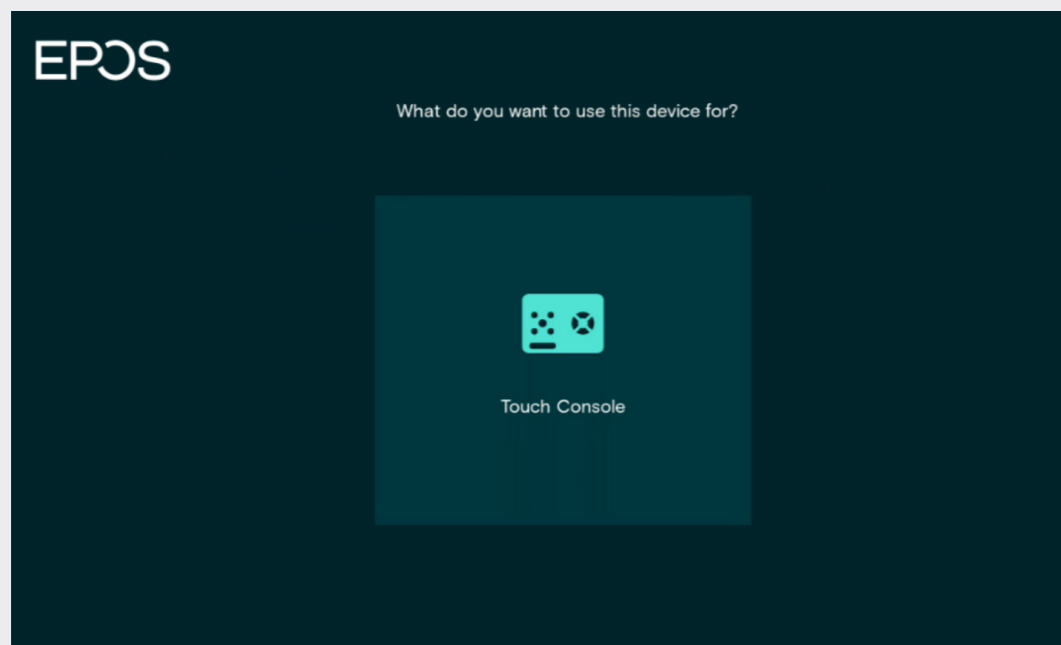

Search for your Time zone

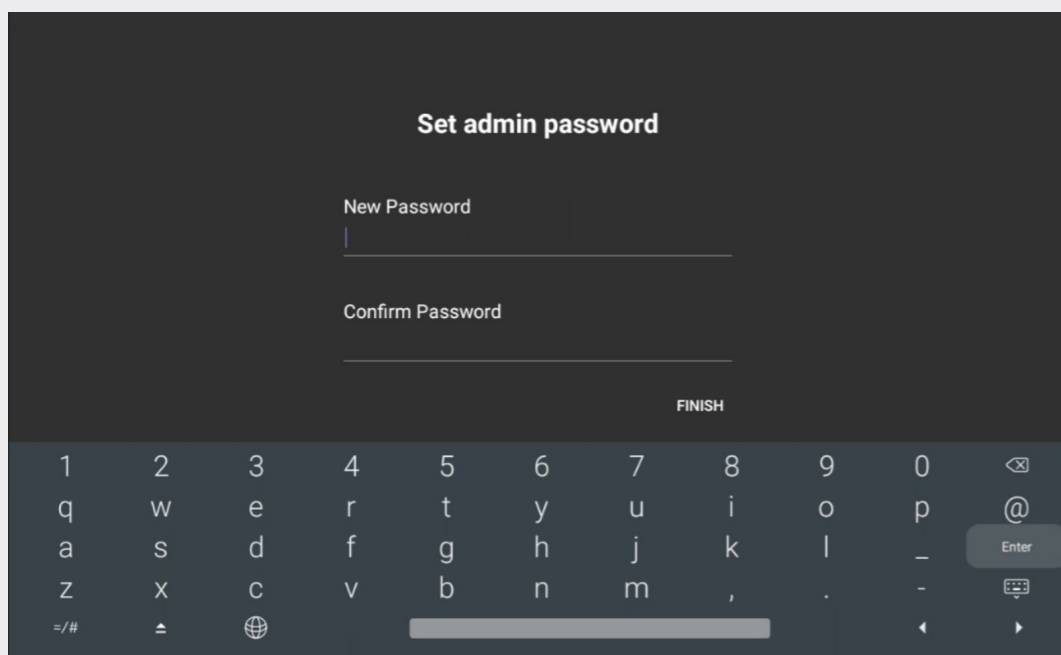

Choose Teams as UC provider for your product

EXPAND Vision 5 Display

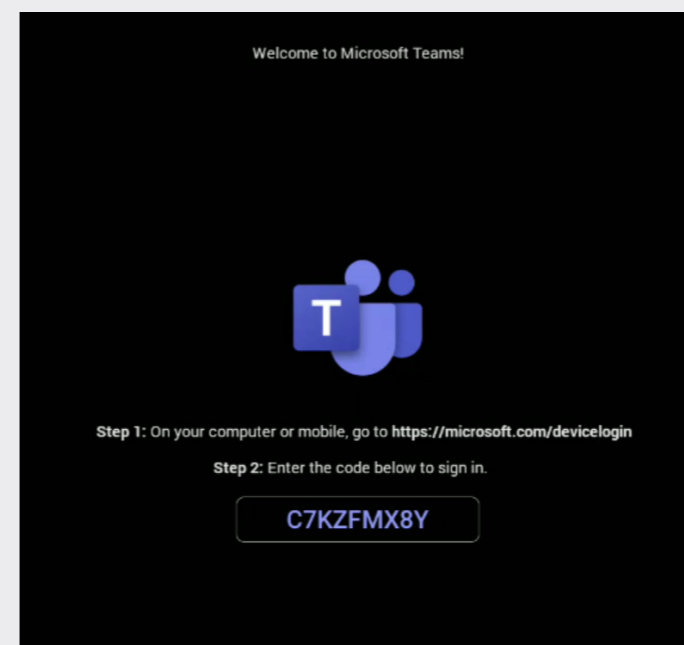

Choose Touch Console

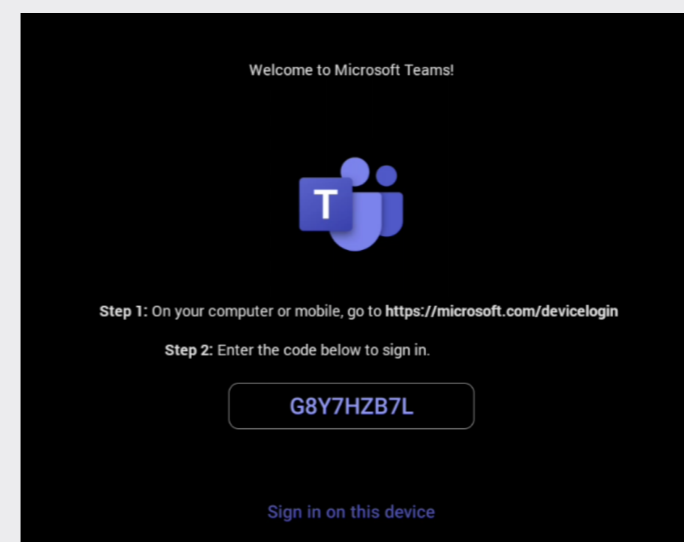

Choose Finish and setup is completed. Default password is 0000 but best practice is to change this.

Setup is completed > device will now start the MS teams login procedure.

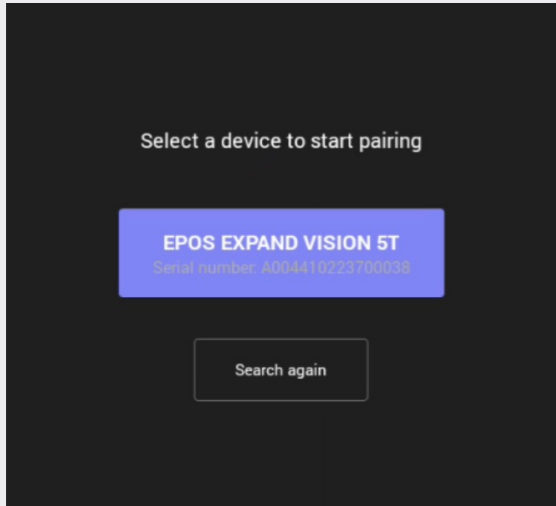

Expand Vision 5 MS teams login
Login into MS teams using the code displayed on the monitor of your Expand device (use the same MTR account for your Expand Vision video device and controller).

EXPAND Control

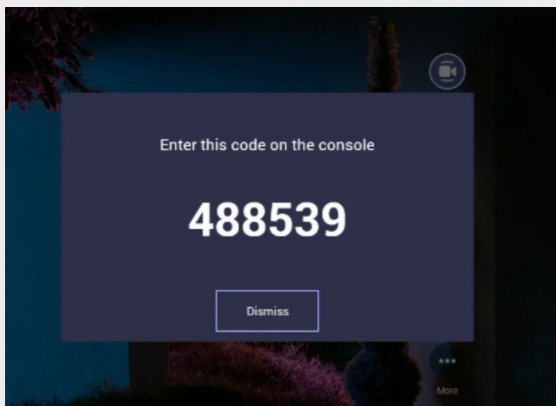

Expand Controller MS teams login
Login into MS teams using the code displayed on the monitor of your Expand device (use the same MTR account for your Expand Vision video device and controller).

EXPAND Controller

Choose EPOS EXPAND 5T to pair.

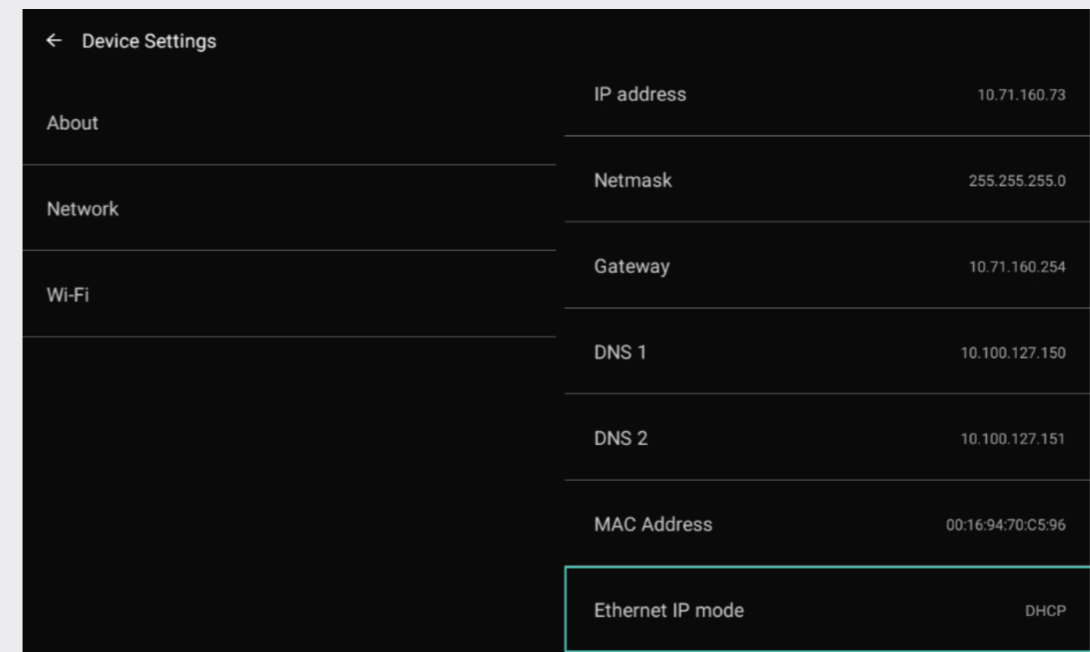

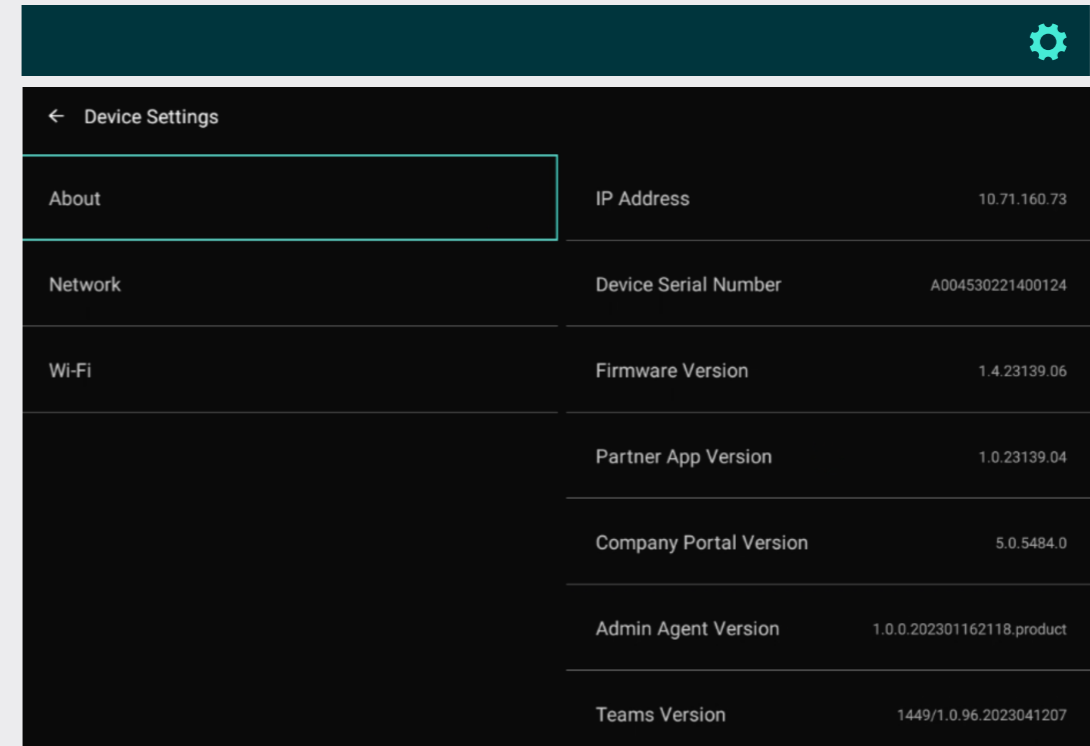

Pairing Code, code displayed on monitor of Expand Vision.

Type in the number from the Expand Vision displayed on the monitor and choose pair. Let the systems get paired and an All Set message will appear as successfully paired.

Optional settings for static IP address configuration

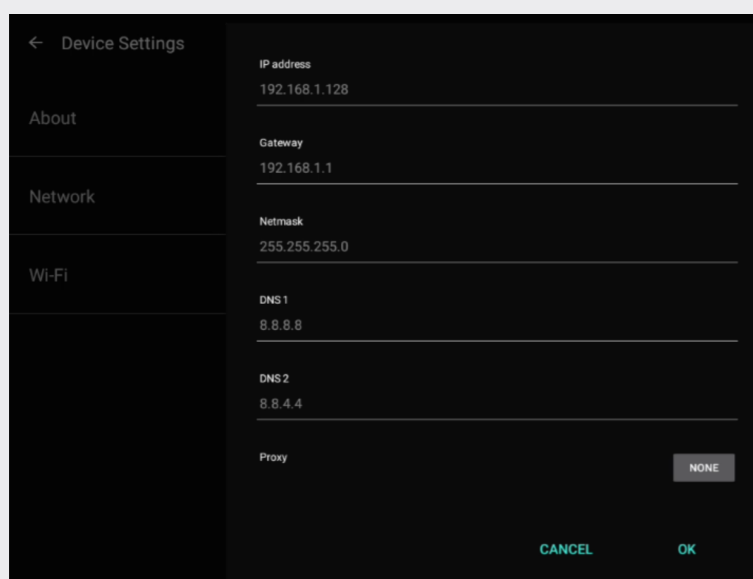

At first-time setup note the cog wheel in the right-hand corner. Tapping into this entry gives you the ability to set the device account to a static IP address required together with DNS, NTP and Proxy settings.

When devices are registered to MS Teams

Choose the static option and ok

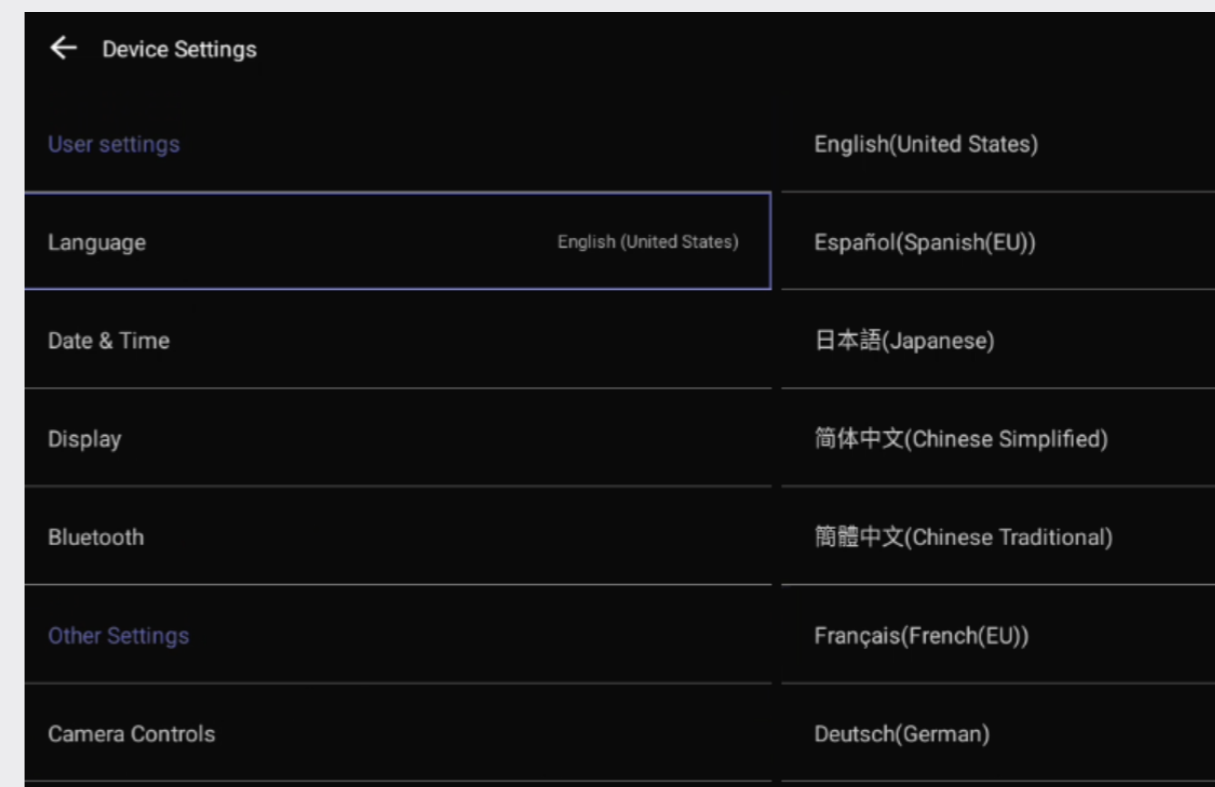

Insert relevant network data.

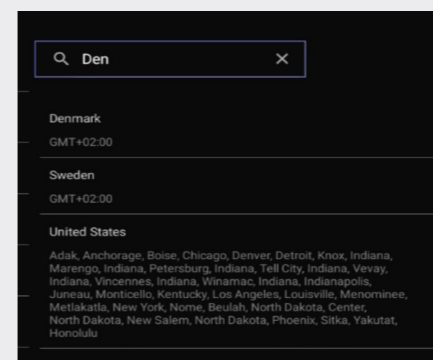

NB! The device supports Wi-Fi. However, we do recommend a wired network whenever possible. If device is connected to the network with a network cable, Wi-Fi cannot be enabled. If Wi-Fi is required for Expand Control, make sure you have a Power Injector for the device as there will be no separate PSU for the control.

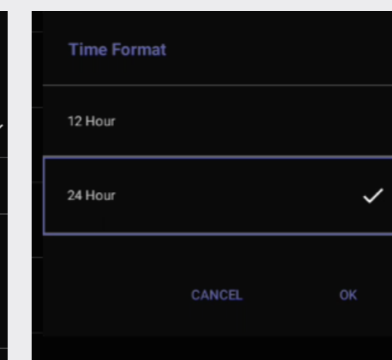

Verify the settings of the setup

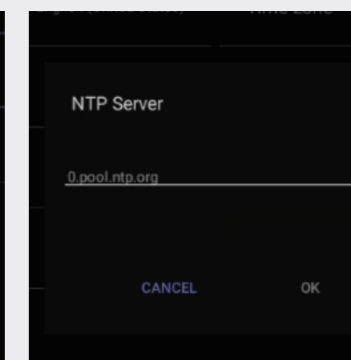

From the Device Settings the settings below can be changed. Date/Time zone Date & Time > Time zone > Choose Zone

Choose relevant Time Zone

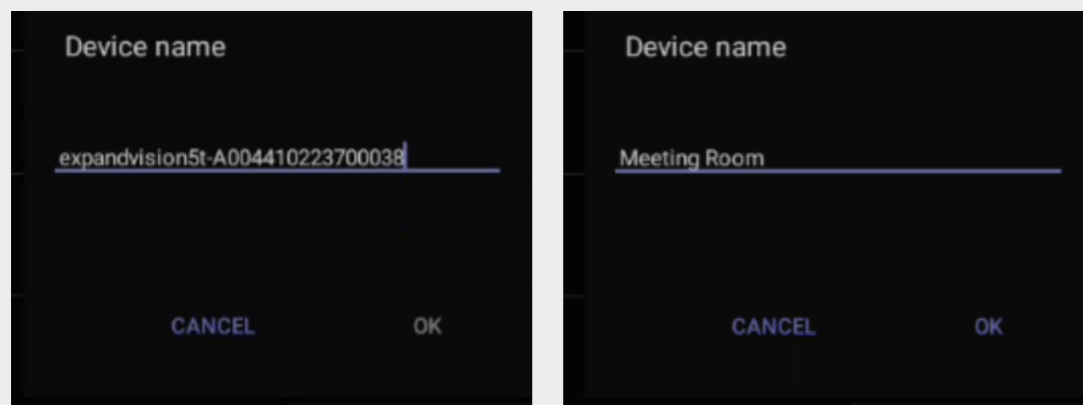

Choose the relevant Time Format

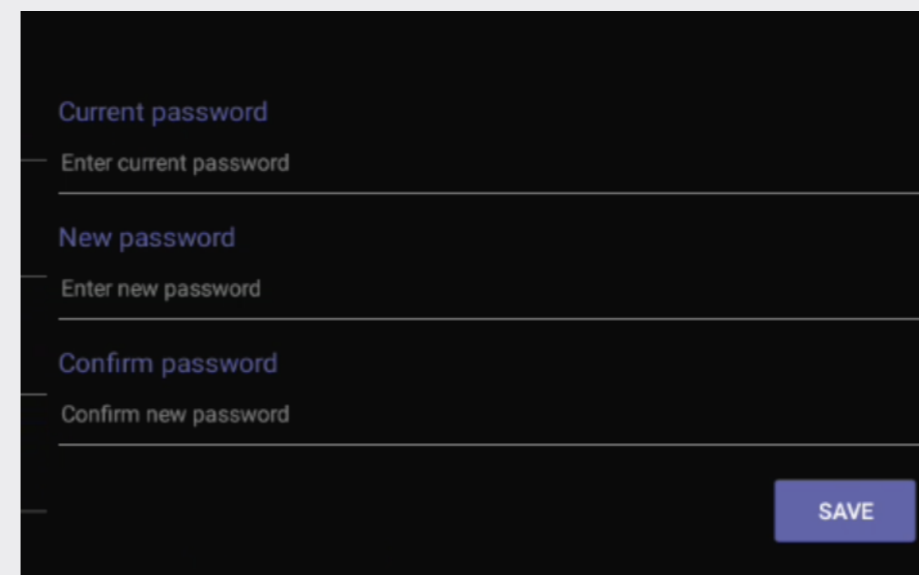

Insert your NTP server address (Optional)

Device Name

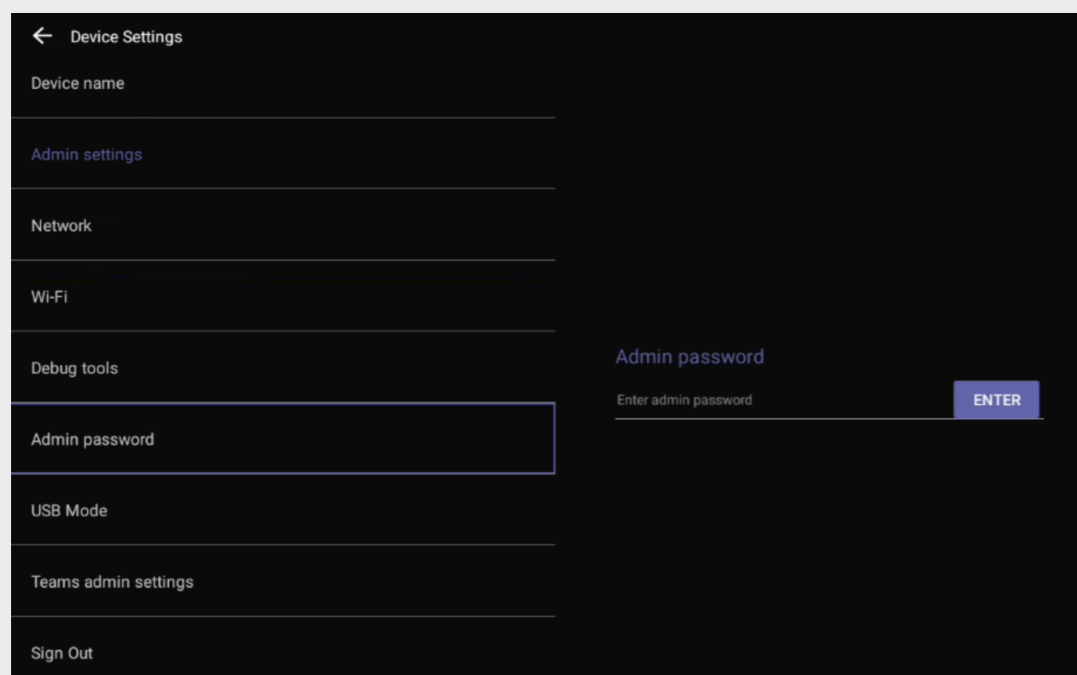

To assign a unique name, delete the default and insert device name according to your naming policy. The name will automatically be synced into EPOS Manager, if enrolled.

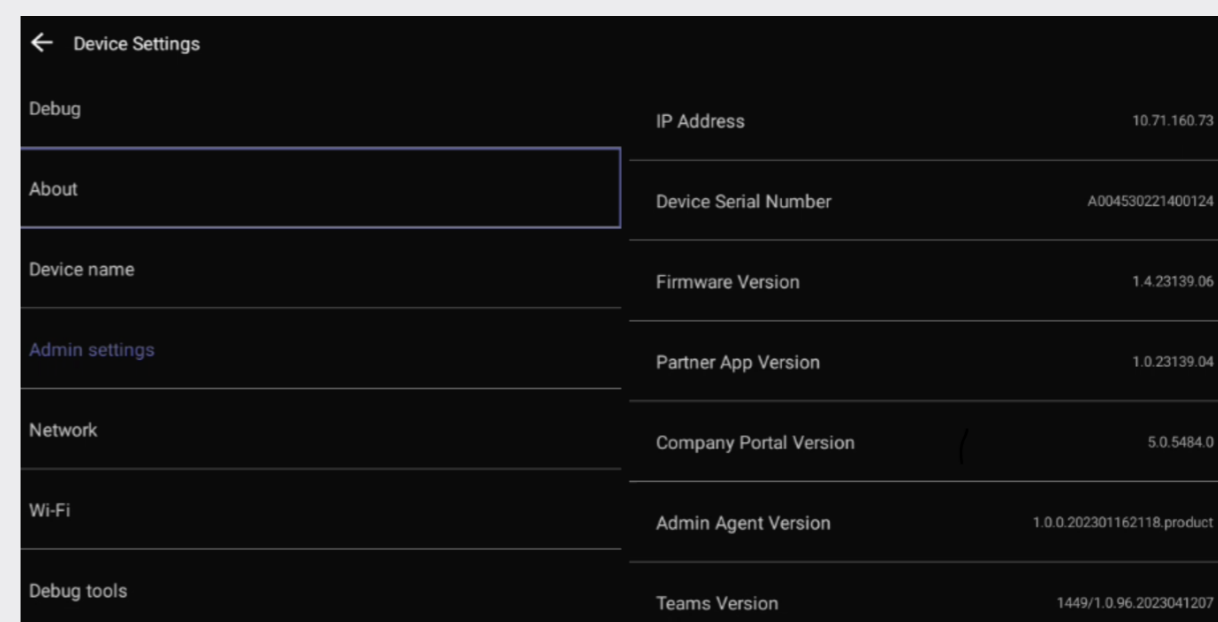

Insert relevant information and choose SAVE

Admin password for admin settings

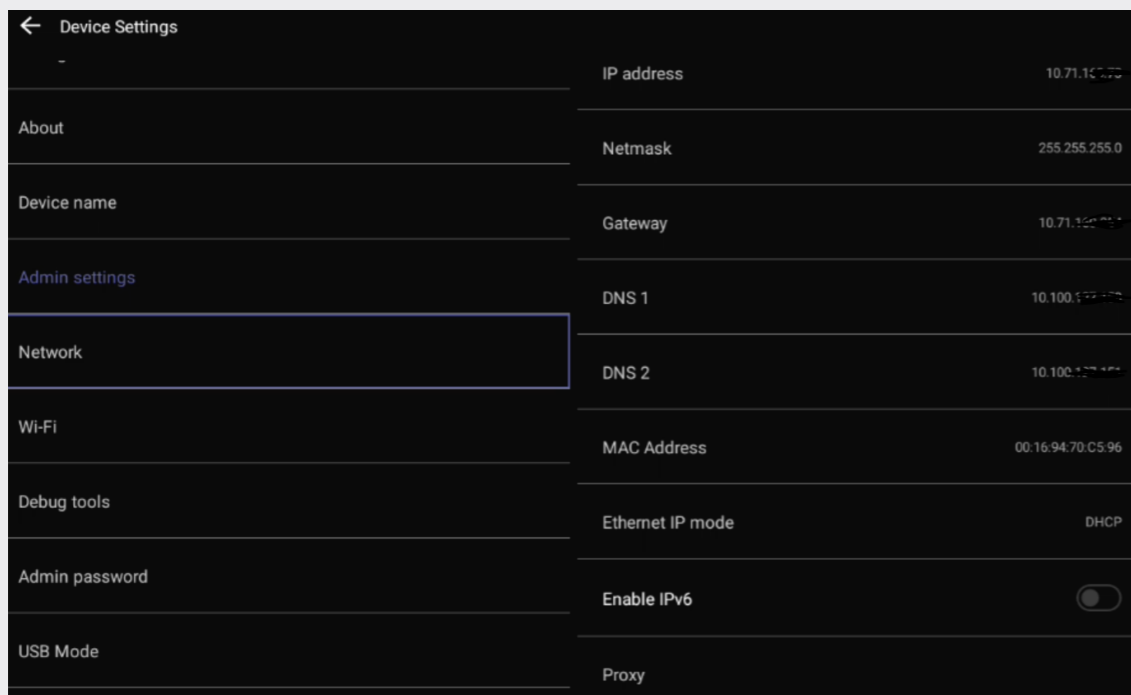

Best practice is to change the default admin password which is 0000.

Verify device details

> Device Settings > About display serial number, ip address and versions

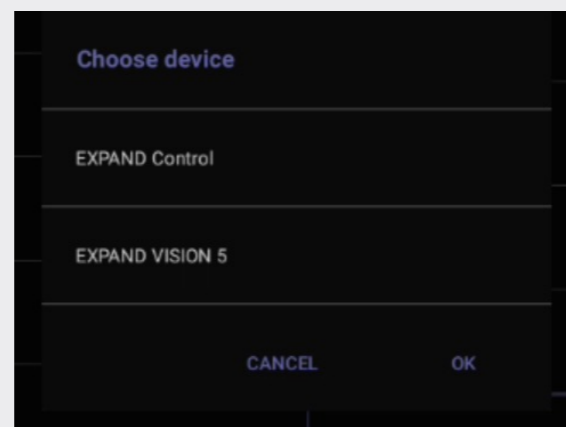

Network Settings

Static IP > Choose Ethernet IP mode

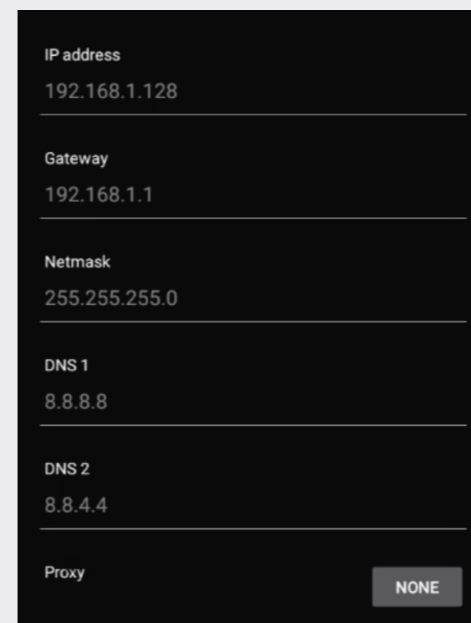

Choose static and then OK

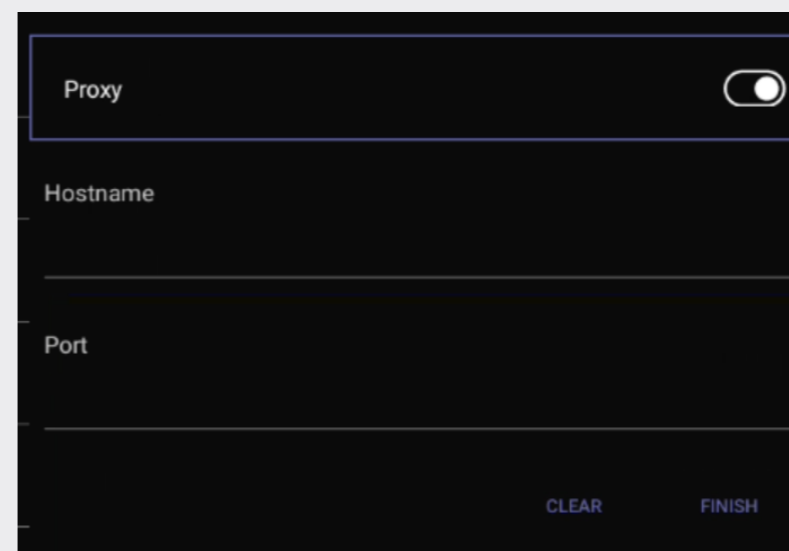

Choose relevant unit. It is recommended to start with the Expand Vision video device as you will lose pairing between Expand Controller and Video device once IP address is changed. Afterwards, change the IP address of the Expand Controller. You may need to reboot both devices to get the pairing running again.

NB! The devices have to be in the same subnet to successfully pair.

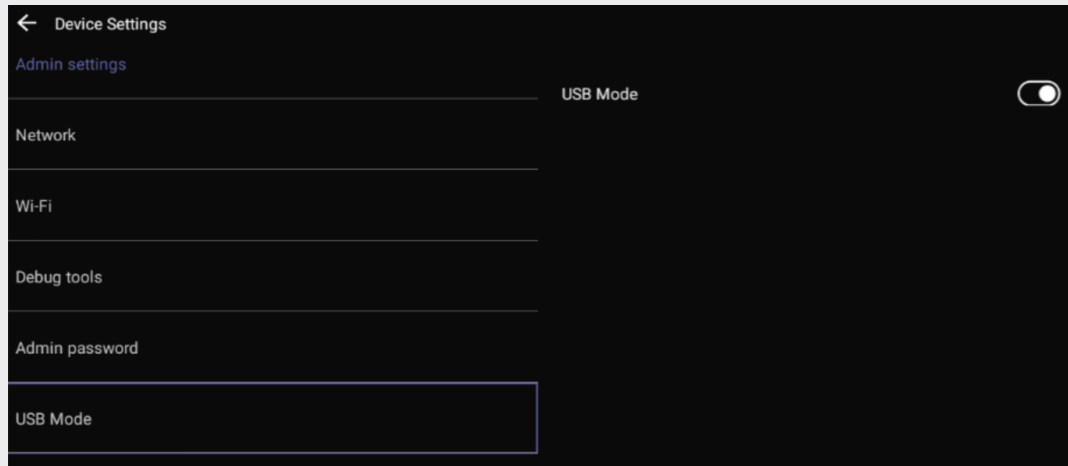

Insert your network data

Proxy Settings

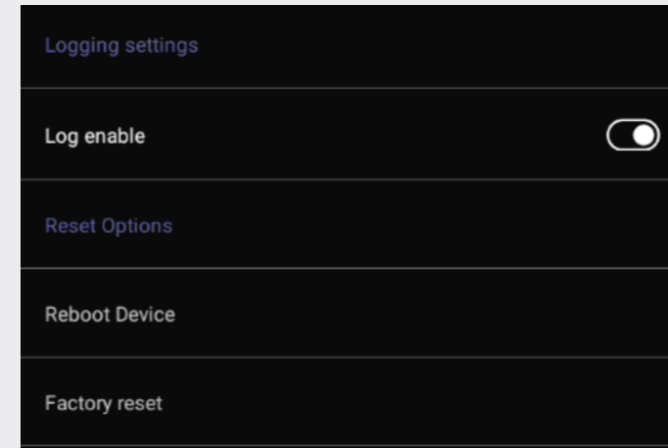

Device Settings > Proxy Enable Proxy and insert Hostname and Port (Optional)

USB Mode

USB mode is on by default

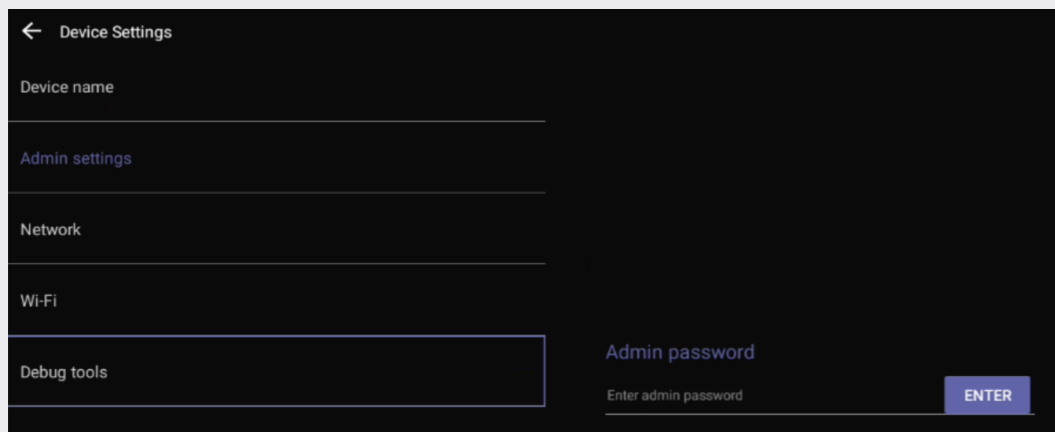

Choose Factory reset

To factory reset the device choose ok or cancel to stop the reset.

Factory Reset

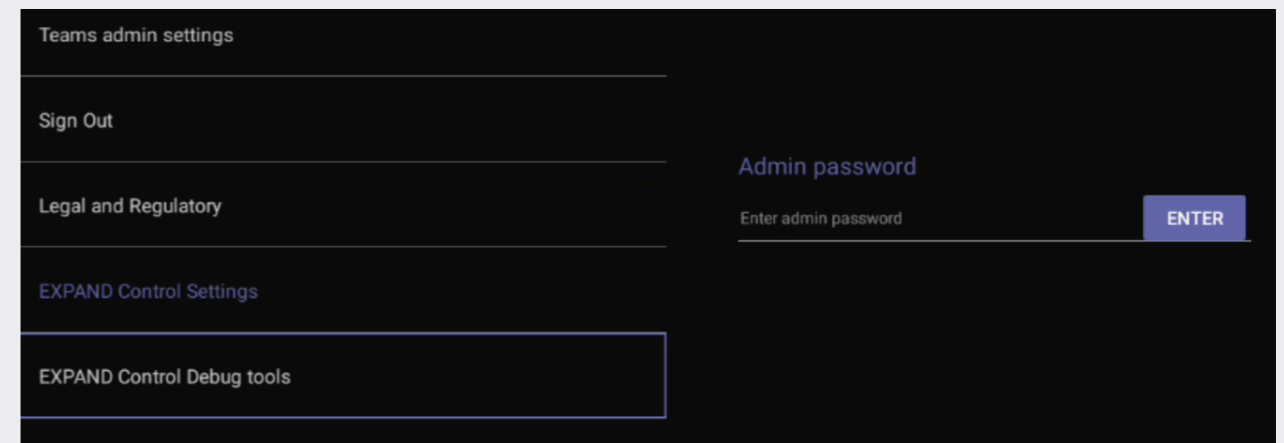

Factory Reset EPOS EXPAND Video Device

Device Settings => Debug Tools => default password is 0000.
Always start with the video device as pairing will be lost between controller and video device.

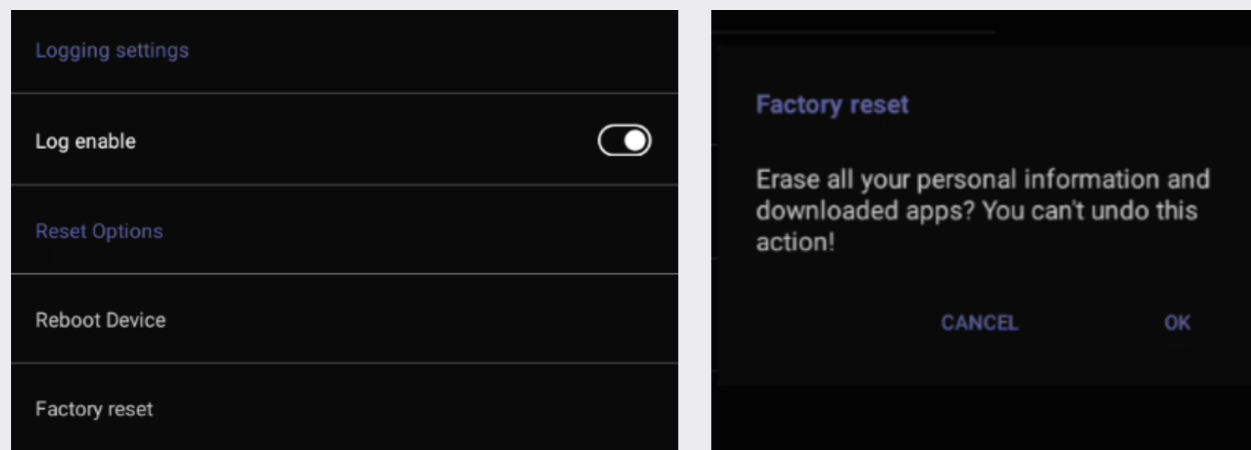

Factory Reset EPOS

EXPAND Controller Device

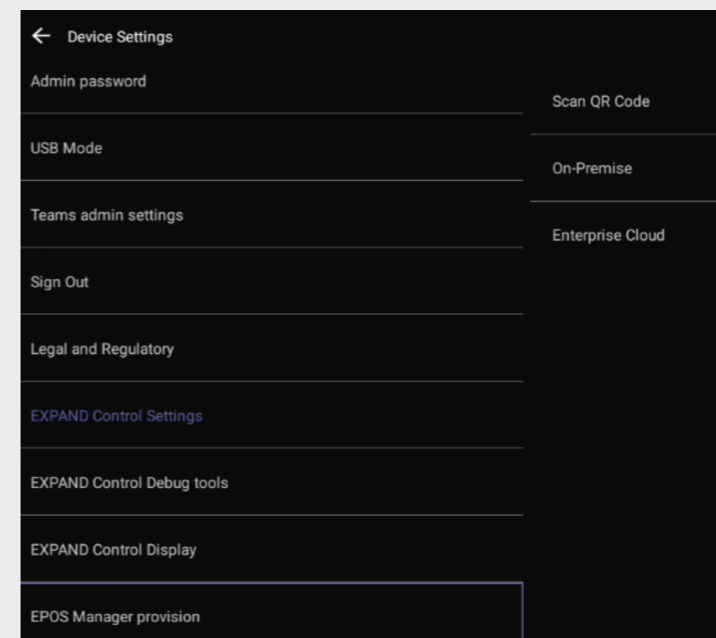

Device Settings > Expand Control Debug Tools > default password is 0000

EPOS Manager Provisioning

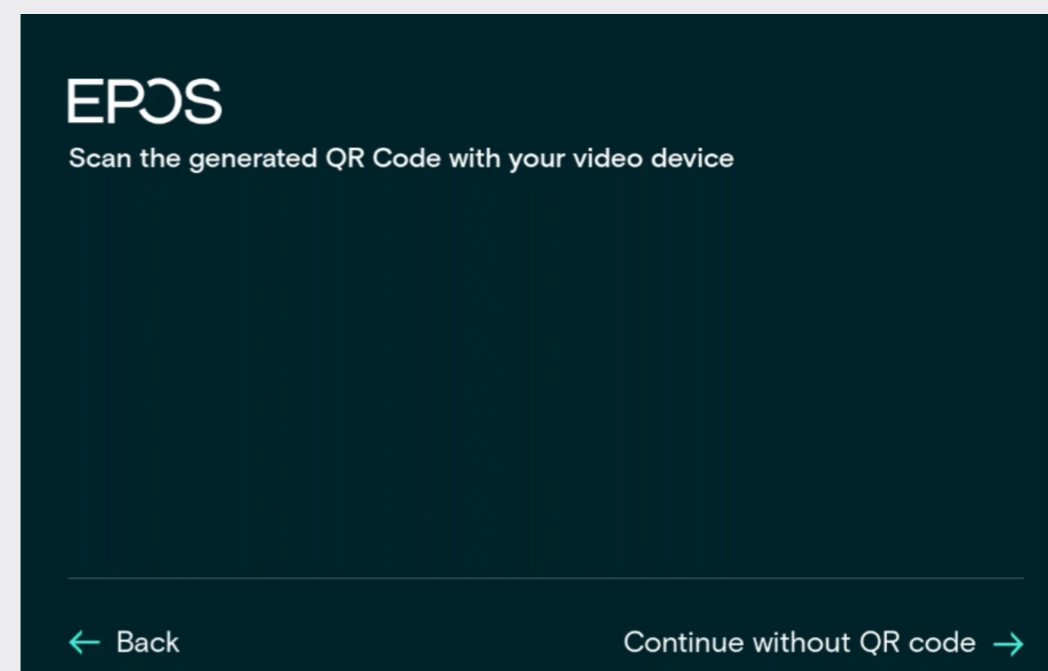

Choose Factory reset

To factory reset the device choose ok or cancel to stop the reset.

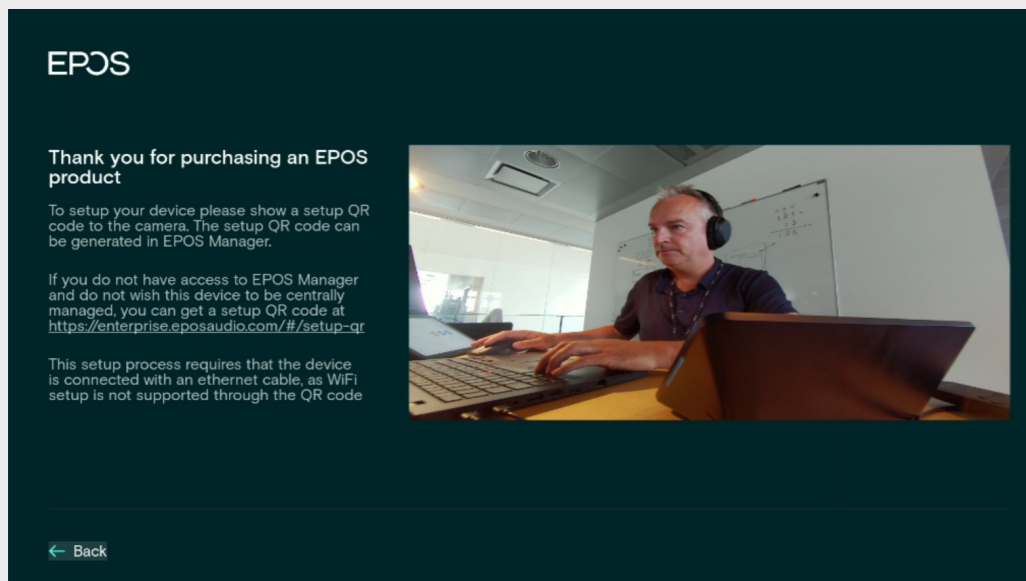

If you didn't enroll the device into EPOS Manager to begin with, you can create your QR code and insert the QR Code in the system. Scan you QR code, choose on-prem and Enterprise Cloud.

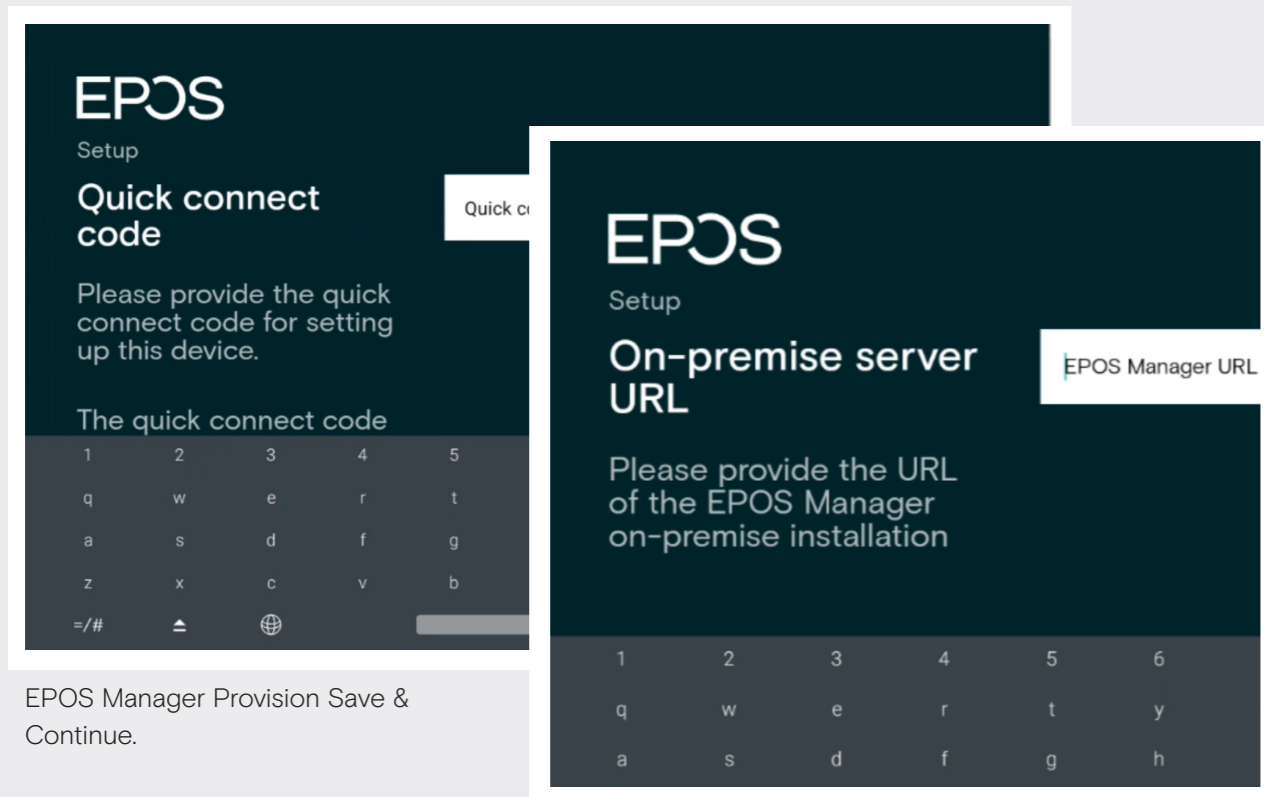

Expand Control Scan QR code
Scan QR code => point your QR code to the camera

Camera Settings

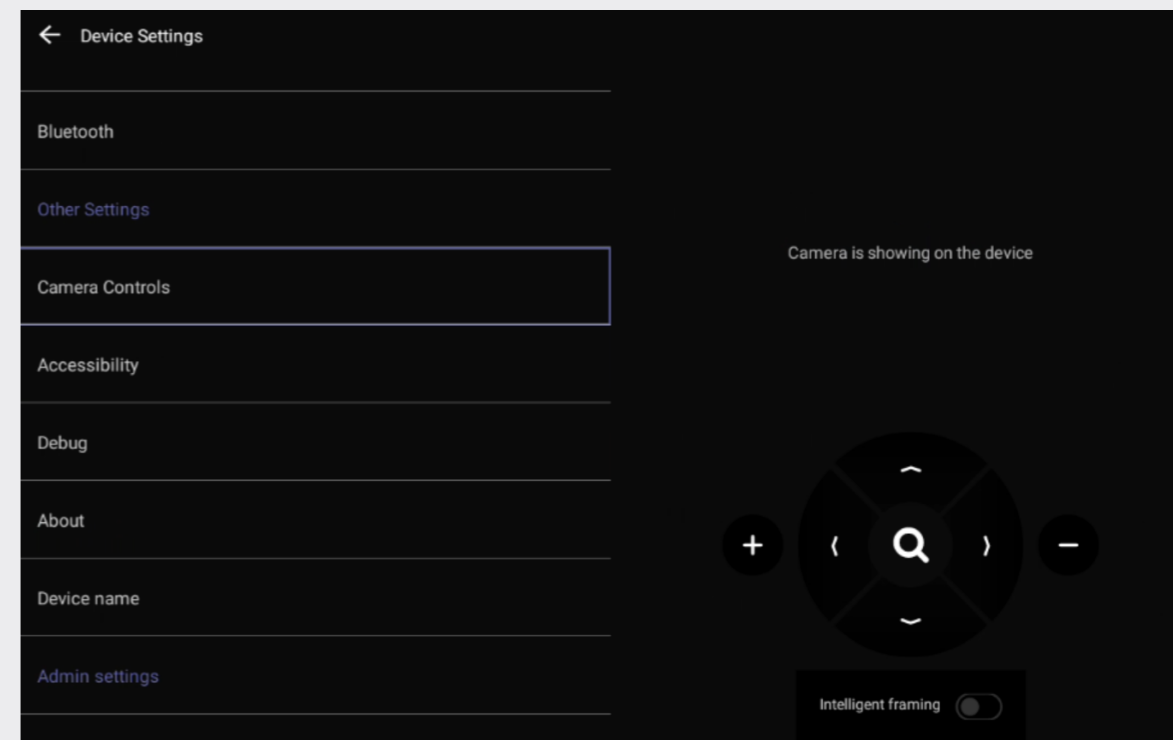

Monitor scan QR code

EPOS Manager Provision Save & Continue.

On premise URL

Device settings > Camera settings

Video feed will be displayed on the monitor.

NB! Make sure that the camera is properly adjusted. You also have the choice to activate the intelligent framing, which means that the camera will adjust the video feed based on number of people and where they are situated in the video room.
