

December 2009 - Copenhagen, Denmark

Stylish, Discreet Bluetooth® Headset for Easy Phoning

Easy calls – Introducing the stylish new EZX 60 Bluetooth® headset, Sennheiser Communications' wire-free answer to making easy phone calls with superb sound quality. When you're talking with business partners or friends on busy streets, Sennheiser Communications' digital noise and echo cancellation ensure every word of your conversation comes through clear and sharp.

The fashionable EZX 60 will keep you talking all day long no matter how busy your lifestyle. It gives you everything you could ever desire in an affordable, super-light headset: superior Sennheiser sound with digital noise and echo cancellation, one-hand convenience and a discreet, smart design that won't ruin your look.

Thanks to advanced Bluetooth® technology, the EZX 60 eliminates the need for bothersome cables, yet delivers clear sound with every wireless conversation from any Bluetooth®-enabled mobile phone.

Superior Sennheiser sound meets Bluetooth®

Despite its tiny, discreet design, the stylish EZX 60 boasts the same first-class Sennheiser sound you would normally only expect with a full-size headset. And to make your phoning experience complete, the EZX 60 also features the latest Bluetooth® 2.1 wireless technology. This advanced protocol ensures outside interference won't spoil the EZX 60's sharp sound – while at the same time eliminating unsightly wires which could get in the way of your hair or outfit.

Echo-stopping sound clarity

Whether you're racing between business appointments or enjoying an afternoon of shopping in the city, Sennheiser Communications' digital noise cancellation always ensures carefree conversations in crystal-clear quality – without any annoying background noise. Now, Sennheiser Communications has gone a step further, equipping the EZX 60 with cutting-edge digital echo cancellation, too. This innovative feature uses the latest digital technology to eliminate all echoes which could disturb your conversation while you're talking.

Ease and convenience at every level

The EZX 60 features easy one-hand operation so you can carry your suitcase or handbag – or shopping bags, too – without dropping them to fiddle with your mobile phone. Just clip the headset on either ear and with just one hand, quickly take and end calls or set the volume as it suits you best

Comfort that won't slow you down

To keep you going for hours on end, the EZX 60 is not only super lightweight (at just 12 grams) – it's also equipped with a comfortable, soft ear hook. Simply flip and rotate it to effortlessly switch between wearing the headset on your right or left ear, without the need to carry around a second ear hook. The long talk time is an extra plus, delivering up to 7.5 hours of phone conversations and up to 300 hours of standby time.

The EZX 60 is available from December 2009.

The EZX 60 at a glance

- **Noise cancelling clarity** – digital noise cancellation reduces background interference for crystal-clear phone conversations even when talking on busy streets
- **Echo-free conversations** – digital echo cancellation eliminates all echoes while you are talking
- **Wireless freedom** – Bluetooth® 2.1 + EDR ensures compatibility with all Bluetooth® 1.1, 1.2, 2.0 and 2.1 devices to give hands-free convenience with your mobile phone
- **Easy call control** – with just one hand, you can quickly take or end calls and adjust the volume to suit you best
- **Lightweight comfort** – weighs a feather-light 12 grams for hours of phoning without irritation
- **Flexible wearing style** – simply flip and rotate the soft ear hook to wear the headset on your right or left ear, no extra ear hook required
- **Long talk time** – talk to business partners and friends for up to 7.5 hours, with up to 300 hours of standby time
- **Peace of mind** – thanks to the 2-year international warranty
